REMOTE ROBOTICS

Rev. Oct 2026

Capability Statement · Distribution: Unclassified // Public release

COMPANY OVERVIEW

Early-stage R&D firm developing legged, subsea and aerial robotic systems operated by trained people through a common teleoperation interface. All systems are at concept stage (TRL 1–3).

CORE COMPETENCIES

- Legged mobility concepts for extreme terrain (ARACHNE, DESTRIER)
- Immersive teleoperation and shared control (DEEPLINK)
- Coordinated aerial construction concepts (HIVEFORGE)
- Human-in-the-loop system design

MISSION AREAS

Expeditionary logistics · Cold-region / Arctic · Hazardous-terrain reconnaissance · Subsea and seabed · Space telerobotics · Expeditionary construction

DIFFERENTIATORS

- One operator interface across ground, subsea and aerial systems
- Operator-approved task actions by design
- Unarmed systems; inspection, logistics and construction roles

COMPANY DATA

UEI	Pending registration
CAGE	Pending registration
PAST PERFORMANCE	None yet (new entrant)
STAGE	Concept, TRL 1–3

NAICS CODES

541715	R&D in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
541330	Engineering Services
333924	Industrial Truck, Tractor, Trailer, and Stacker Machinery Manufacturing
333120	Construction Machinery Manufacturing
